Crisis on Canadian Campuses

A Deceptive Campaign of Misinformation is Being Used to Destroy the State of Israel.

Universities are the new battleground being used by Radical Iran to demonize Israel. “Ethnic Cleansing” – “Apartheid” – “Collective Punishment” are key words meant to deceive the public and undermine the genuine victims.

A campaign of hate has permeated our campuses and, one by one, they are being taken over.

The following program will analyze, through the mirror of history, what has transpired on university campuses in the past several years and consider these events in the context of the upcoming conference (to be held a week later at **York University**) which calls for a “**One State Solution**” – a euphemism for the destruction of the State of Israel.
